

Completed Sidewall Insulation

It's not unusual to discover that while your attic is insulated, your sidewalls are not. Unfortunately, you can still lose a lot of heat and cold through your walls, especially around vents, electrical features, and other units.

Let Illinois Valley Insulation finish off your insulation with a sidewall application. We'll let you know whether spray foam or blown materials are the way to go and ensure you get proper service that does the job!

Make Insulation Work for You

You'll always get personal service from our full-time, full-service company.

- Owner on-site during most jobs
 - A+ rating with the BBB
- Fast response to phone calls and email contacts
 - Military and senior discounts

Call us now at 815-875-1901. Insulation is almost always a good investment and we'll show you how you can make it work to your benefit.
